

# TRIO

THE EUROPEAN MASTERPIECE FOR YOUR KITCHEN

# The Trio : Oven/Cooktop/Dishwasher

What an ingenious item!

The Candy 3 in 1 TRIO reflects the new trends of technology and design together with the intelligent use of kitchen space.

The TRIO is the ultimate space saver. Allowing you to incorporate a dishwasher where you would have never dreamed. Yet still accommodating a multifunction oven and vitro ceramic cooktop.

All this comes in one free standing unit that is only 60cm wide.

As always Candy continues to provide innovative and practical solutions to make our lives easier.

## A true table of cooking

The design is elegant and essential. Without framework, the Trio vitro-ceramic table is suitable for any type of cooking style. Equipped with independent inductors, all plates can be used simultaneously with an overall maximum power of 6600W and 12 power levels.

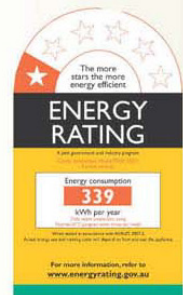

## An oven with 40 litre capacity

- ◆ Functions include natural convection cooking, grill and Rotisserie
- ◆ Maximum 120 minutes electronic timer
- ◆ Maximum 230°C cooking temperature
- ◆ Double glass mirror door

## A dishwasher with 6 place settings

- ◆ Electronic control
- ◆ 5 wash programs
- ◆ 4 temperature selections
- ◆ 11.4 litre water consumption per cycle
- ◆ 339 kWh energy consumption per year

## The Trio, a unique item

- ◆ Designed for a small space  
Providing a real space saving solution for your kitchen
- ◆ Tailor-made for small family use  
The perfect addition for all small households
- ◆ Ideal solution for developers / renovators  
The TRIO allows property developers / renovators to dedicate valuable kitchen space to cupboards and other useable areas, whilst still boasting an oven, cooktop and dishwasher.

# A story which also includes you

## The world was changing, Italy was getting ready for rebuilding, for growing.....

It was in 1945 that the Model 50 first saw the light of day in the workshops of Eden Fumagalli at Monza, famous for the manufacture of precision instruments. It was one of the earliest miracles of domestic well-being: the first all-Italian washing machine. A product of Eden Fumagalli's extraordinary talent, the new machine officially launched at the Milan Fair of 1946.

The Candy brand name came into being. Since then its progress has been marked by extraordinary success. The founder's sons, Enzo, Niso and Peppino Fumagalli started washing machine production, making them the centre and the strength of their manufacturing activity.

Unstoppable, in 1954 Candy made a decisive move in washing traditions: the birth of the Bi-Matic, the first semi-automatic washing machine with a spinner. Candy opened its first production plant abroad, in France. Just six years later, the washing machine became completely automatic: Candy raced ahead on the road of innovation.

While the washing machine was being refined, enriched and "learning" to save water and energy, the Stipomatic, the first Candy dishwasher, was launched. Candy had already progressed beyond washing machines...

Niso Fumagalli, the originator of most of the patents, was awarded an honorary degree in engineering by the University of Genoa. In the 70s an important new phase started for Candy: that of acquiring other Italian companies, starting with La Sovrana of Parma, a historic brand name in the cooking sector and Kelvinator Italia, internationally famous for its refrigerators and freezers. Candy also drew up an agreement with Kelvinator America to produce and market domestic products with the American name all over the world.

There was another important advance in the 80s: the international expansion of Candy and the further acquisition of prestigious European companies.

### A Brief rundown:

**1980.** Candy acquires Kelvinator UK and its factory at Bromborough, Wirral, England.

**1985.** Two successful Italian brand names join the Candy Group: Zerowatt, manufacturers of washing machines and tumble dryers, and Gasfire, specialists in built-in cookers.

**1987.** Candy acquires Rosieres, one of the most prestigious French companies in the manufacture of built-in cookers.

**1992.** Mayc, an important Spanish company producing top loading washing machines under the Otsein brand name.

**1993.** Candy acquires Iberna, refrigeration specialists.

**1995.** Candy acquires Hoover European Appliance Group, European leader in vacuum cleaners with its three production plants in Wales, Scotland and Portugal.

**2005.** Candy acquires Vesta (Russia) specialist manufacturers of washing machines.

Candy now has plants all over the world: Italy, UK, France, Spain, Czech Republic, Russia, and China.

Today, Candy, strengthened by its long and comprehensive experience in the domestic appliance sector, plays a leading role in the international field. It is in the forefront of new technological developments, always attentive to the needs of the modern consumer and sensitive to the needs of a new family lifestyle whose priorities are relationships, the freedom to develop them and the time to nurture them.

A great product is not invented.  
It is built out of technology and experience.  
Candy has more than 60 years tradition making modern,  
dependable, beautiful appliances.
