

**BRINGING CANDY'S QUALITY EUROPEAN DESIGN
TO A SMALLER SIZE APPLIANCE - THE NEW BENCHTOP DISHWASHER
CCDF6 (WHITE) & CCDF6S (SILVER)**

... A REAL SPACE SAVER

THE NEW CANDY BENCHTOP DISHWASHER - SUPERIOR STYLE AND PERFORMANCE IN A COMPACT DESIGN.

VERSATILE

Don't like washing up by hand, but find a full size dishwasher takes too long to fill or is just too large for the space available, then consider the Candy CCDF6(S). It uses as little as 8 litres per cycle and being only 44 cm high (microwave oven size), the Candy CCDF6(S) is designed to be installed on the kitchen bench. It can be easily attached to a kitchen tap by using the tap adaptor, or even be built in and permanently connected to the plumbing.

DELAY START TIMER

The Candy CCDF6(S) has a delay start option. This means you can take advantage of off-peak electricity charges by delaying the start of your cycle by 3, 6, 9 or 12 hours.

OUTSTANDING PERFORMANCE

There are 6 programs to choose from – Intensive, Normal, Economy, Glass, Rapid and 3-in-1, along with 5 temperature settings, providing all the flexibility and performance you need.

SAFE SMART DESIGN

The CCDF6(S) has a space saving design featuring the control panel along the top of the machine. It is perfect for small kitchens, holiday homes, offices, caravans or even the boat.

FEATURES

- 6 place setting
- Electronic controls
- Program sequence lights indicating the program's progress
- Stainless steel interior and spray arm
- Detergent and rinse aid dispenser on door
- 5 temperature options
- Safety interlock door mechanism
- Double overflow control mechanism
- Double wall to prevent heat loss and minimize noise
- Colour options: White (CCDF6) or Silver (CCDF6S)

TAP ADAPTOR - OPTIONAL EXTRA

The snap-on/snap-off tap adaptor is recommended if you want a temporary connection to a kitchen tap ie mixer tap. They are \$75 and will fit most modern taps that have an aerator. Once the aerator is unscrewed, it will leave an external or male thread that the tap adaptor fitting screws onto. If your tap has an internal

or female thread, an additional adaptor can be purchased from most hardware stores for minimal cost.

TECHNICAL SPECIFICATIONS

Dimensions: (HxWxD) 44 x 55 x 50cms
Power Supply: 240V 50Hz 10A
Wattage: 1280W
Inlet Hose: 1.8m
Outlet Hose: 1.2m
Electrical Cord: 1.4m
Weight: 22kg
Water Consumption: 8 litres+
Energy Consumption: 0.8kWh
Length of Cycle: 30-120 minutes
Water pressure Max: 1.00MPa, Min 0.03 MPa
Warranty: 12 months (limited 'cash & carry' warranty)
